Whip up dinner for yourself or friends in your hip and fully remodeled space. Commute downtown by car or bus with total ease or take your pup for a walk in the quiet neighborhood filled with beautiful houses and green spaces. Enjoy coffee on your private deck while taking in the morning light and views.

This is an extraordinary property that offers much more than your average one-bedroom condominium! It has a great layout and every inch of space is used to its fullest, making it not only an aesthetically beautiful home but also one that is super easy to live in! This condominium has been completely and meticulously remodeled by the owners for their own use (read: not a flip!). The kitchen is a modern masterpiece with cool subway tiling, brand new stainless steel appliances, a sleek sink and fixtures and expansive quartz countertops. It opens up to the living room, so the cook is always connected to the action, whether that's chatting with guests or just looking out onto the lovely neighborhood. There's plenty of storage space for your cooking stuff and even built in shelves for more storage or to decorate with your own special personality.
